RE: Bellows Order
Calpine Pasadena Phase 2

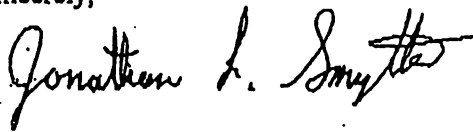

Dear Mr. DeAnda,

Thank you very much for the excellent work you and your associates at PTP/USB provided on my bellows order. Although we agreed to a 10-day rush delivery, your shop responded to my project schedule and delivered fourteen (14) bellows assemblies in only 7 days from my order. This quick delivery helped us avert a scheduling conflict on a very critical project.

I would be glad to recommend U.S. Bellows to anyone in need of a quality product with on-time or better delivery.

I am looking forward to working with you and the other professionals at PTP/USB again in the future.

Sincerely,

Jonathan L. Smythe, P.E.
Plant Engineer
