**Piping Technology & Products Recognized by Bechtel for Supply Chain Excellence**

*PT&P and subsidiaries, U.S. Bellows, Inc., Sweco Fab, Inc., Pipe Shields, Inc., and Anchor Darling, Ent., were honored for outstanding contribution and commitment.*

**Houston, TX** — Piping Technology & Products was recognized today for its supply chain excellence when supporting Bechtel's Oil Gas and Chemicals projects. The Bechtel Supply Chain Recognition Awards celebrate subcontractors and suppliers who supported Bechtel's work on projects around the world during 2018.

"Working collaboratively with our supply chain is critical for us to deliver successful project for our customers around the world," said Gerry O'Connor, Bechtel's OG&C Manager of Procurement and Contracts. "Working with suppliers that are committed to providing quality products and superior service enables us to provide enhanced outcomes for our customers."

Companies were evaluated on multiple factors. They include: overall performance; the ability to deliver quality services/supplies on time; the ability to work collaboratively to meet milestones; and meeting or exceeding project expectations in aspects of safety, construction performance, technical expertise, and environmental compliance. Nominations were reviewed and approved by Bechtel procurement and project managers. Final recommendations were approved by senior leadership.

**About Piping Technology & Products**

In business since 1975, Piping Technology & Products (PT&P) manufactures high-quality engineered pipe supports, pipe hangers, pipe shoes, pipe expansion joints and more. We design and manufacture an extensive product line supporting the chemical, petroleum, LNG, power, solar, geothermal, wastewater industries. Our field service specializes in survey and inspection, adjustment, refurbishment, installation and maintenance and on-site project supervision. We also have a 24x7 emergency service for unplanned shutdowns and outages, or for any need that may arise.

**About Bechtel:**

Bechtel is one of the most respected global engineering, construction and project management companies. Together with our customers, we deliver landmark projects that foster long-term progress and economic growth. Since 1898, we've completed more than 25,000 extraordinary projects across 160 countries on all seven continents. We operate through four global businesses: Infrastructure; Nuclear, Security & Environmental; Oil, Gas & Chemicals; and Mining & Metals. Our company and our culture are built on more than a century of leadership and a relentless adherence to our values, the core of which are safety, quality, ethics, and integrity. These values are what we believe, what we expect, what we deliver, and what we live. [www.bechtel.com](http://www.bechtel.com)

Mr. Mr. Argawal

On behalf of the Q-Chem Project team I wish to take this opportunity to thank you and your team for an outstanding performance in designing and fabricating a pair of 30" flexible expansion joints required by this project on an emergency rush basis.

The expansion joints were placed on order on 21Mar2003 and delivered within six (6) days, and the quality and appearance met or exceeded expectations for such a rush order.

Your whole team from sales, engineering through manufacturing is to be congratulated for a job well done.

Sincerely

Pipe Supports

Dear Mr. Agrawal,

The Exxon Baytown Coker Project wishes to acknowledge the efforts made by Piping Technologies & Products, Inc. for the fabrication of Pipe Supports on behalf of our project. As a result of your company's efforts, the project has positioned itself for success.

Your continued support may still be required as we finalize our construction efforts and begin the startup and commissioning of the Coker unit.

Once again, please accept our thanks to you and all personnel who supported this effort.

Very truly yours,

Subject: EQUATE Project - Expansion Joint

Dear Mr. Bailey:

We would like to extend a special thanks and a note of appreciation for the wonderful job that Piping Technology did in providing Fluor Daniel the above mentioned expansion joint in such a short and critical time frame.

We understand this expansion joint is normally a long lead time item and we appreciate the exceptional help and efforts of all those involved, especially Mr. Walid El Hajj. As you know we are currently in the process of turning over plant operations in Kuwait and all items preventing a smooth and complete release are therefore critical. The professionalism and urgency Piping Technology demonstrated during this effort is appreciated.

Please accept our thanks for a job well done.

Subject: Recognition of Robert Pavlock

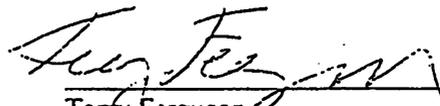

Gentlemen:

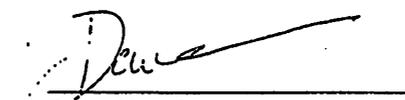

We have been associated with Robert Pavlock over the past few years and we felt it was time to recognize Robert Pavlock for his contributions to the success of the projects.

Robert is proactive, very customer focused, and has walked the extra mile to meet the customer needs. For example, on the PPG and TAMPA jobs. Robert through his dedication and proactive efforts, was able to improve the shipment date of the pipe supports and meet the jobsite required dates. On the ROHM & HAAS projects. Robert personally handcarried some the critical pipe supports to the jobsite to support our construction efforts.

Robert is always available to help us whenever the need arises. If you have any questions, please do not hesitate to contact us.

Yours truly,

Dear Randy:

Thank you for your very generous monetary support of the American Heart Association's "Heart Walk". The latest information I have on this event (for which Brown & Root is one of the major sponsors) is there will be at least 500 Brown & Root employees (plus their spouses and children) who will be participating in the actual "Heart Walk" on October 12, 1996. Together with participants from the other 24 major sponsors (which include Amoco, Conoco, FMC Corporation, Merrill Lynch, The Methodist Hospital, Shell Oil Company, and Texas Commerce Bank), I anticipate there will be several thousand people "walking the course".

Best regards,

Durga D. Agrawal  
Piping Technology & Products, Inc.  
P.O. Box 34506  
Houston, Tx 77234-4506

Dear Durga:

I would like to express Fluor Daniel's appreciation to Piping Technology on the job well done on the Chevron, Pascagoula, Mississippi Project.

In particular, I would like for you to recognize James Cousins, Randy Bailey, Senu Nagappan, Ben Tatum and his shop workers and your shipping crew for getting the springs and teflon slide plates out on time and to the job site so that Chevron can restart this unit ahead of schedule. I was told this morning that everything has arrive at the site safely and as requested. Please pass this word of appreciation to each of these employees.

It is not often enough that we pass on the appreciation to those who do the real work in meeting the schedules. Most of the springs were on time, and some were ahead of schedule. The people at PT&P is one of the reasons why there is a good working relationship between Fluor Daniel and PT&P. We look forward to continued success of this relationship.

Sincerely,

*Don Clark*

April 20, 1993

Mr. James Cousins  
Piping Technology & Products, Inc.  
P.O. Box 34506  
Houston, Tx 77234-4506

Dear James:

I want to express our sincere appreciation for your excellent presentation of PT&P's vibration dampeners. As I explained to you earlier, we have resisted using the mechanical type dampeners and always tended toward the hydraulic type. I believe you have helped us to understand the capabilities of the mechanical type. We will look forward, in the future, to specifying the mechanical dampeners as projects warrant their use. I trust, as with other PT&P products, you will want to work with us with our needs and questions.

Your abbreviated catalog has some information that will be useful to our design needs for the mechanical snubbers. However, there is other data that we will need in order to determine if your product will dimensionally fit our particular cases. Your competitor's catalog provides us with outside diameters and lengths of the cylinders, rods and end attachments. This information is necessary to determine if a particular assembly will fit in the physical location. As we also mentioned during your visit, we do not have any catalog information regarding your hydraulic snubbers. As Denny Maresh expressed to you, catalog information, sometimes, determines who is on the bid list. When the information is not there, we tend to forget a vendor provides the product.

We are looking forward to the new PT&P product line catalog you have told us is in the works. Thank Durga for us for allowing you to spend your morning with us.

Sincerely,

*Don Clark*

Dear Randy:

On behalf of Bechtel Construction Operations Incorporated, I would like to personally thank you for your continued support of our Piping/Mechanical Workshop. The demand from our employees for this course remains high and the feed back from the attendees is very positive.

As one of our important piping/mechanical suppliers, you add significant value to the services rendered to our many customers. We are looking forward to working with your team on another session in the Gaithersburg, MD area in May of 1995.

Sincerely,

  
C.R. Powell

Attn: D. Agrawal

Subject: BD6513-CH500-66

Dear Mr. Agrawal,

I am writing this letter to thank Piping Technologies for your excellent performance on the Cit-Con project in Lake Charles, Louisiana. You performed on schedule and with good quality. I have requested that Mr. J. Mika (Badger Design and Constructors Procurement Manager) recommend Piping Technologies and Products be placed on the bid list for other Badger projects. Please extend my thanks to your staff and the shop personnel for a job well done.

I think this would be an opportune time for Terry McCormick to visit our Tampa Office and meet with our engineering group, procurement manager and project buyers. We have a few projects developing that might have pipe support requirements.

Again thank you for your commitment to our project and meeting our requirements.

Sincerely,

  
Mark Cotugno

Pipe Supports

Dear Mr. Cauthen:

I wish to express my personal appreciation to you and your staff for your commendable efforts in support of the Cedar Bayou NAO Expansion Project. At this writing, we are within six months of mechanical completion of the project. Construction activities are at a peak and the landscape of Chevron's Cedar Bayou Plant complex has changed dramatically. Your equipment supply efforts contributed significantly to this progress, and on behalf of the Project Management Team, enclosed is a plaque which recognizes Piping Technology & Products, Inc.'s efforts.

We certainly look forward to the next opportunity to work with you and continue our success!

Very truly yours,

**JOINT MANAGEMENT COMMITMENT**

This document establishes the commitment of Foster Wheeler USA Corporation, Southwest Operations and Piping Technology & Products, Inc., to seek, develop and maintain a long-term operational relationship that ensures the delivery of cost-competitive quality products and services meeting the intended use.

This relationship is founded on the following mutual objectives and goals:

- Achieving the classification of Certified Supplier
- To be judged first in customer satisfaction and excellence
- To deliver products and services that meet customer expectations
- Consistently meet our commitments
- Fostering trust and cooperative efforts to meet performance goals
- Maintaining lines of communication that permit rapid resolution of problems

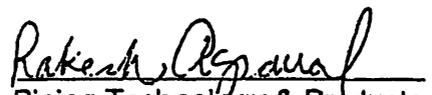

The relationship will be developed using the guidelines embodied in the Foster Wheeler Value Added Purchasing Program which includes the performance goals for classification as a Certified Vendor and the Value Added Purchasing Expectations and Requirements.

In recognition of these objectives and performance goals, the undersigned acknowledge on behalf of their respective enterprises commitment to develop a relationship that will meet our mutual objectives, to meet periodically to review the status and effectiveness of the relationship, and to establish interim performance goals that will drive the Value Added Purchasing Program.

# HEARD?

**"HIGHEST,  
CONSISTENT  
PERFORMANCE BALANCE  
OF PLANT  
PIPING MATERIALS"**

Expecting nothing less than the absolute best. Quality, accuracy and dependability. At Piping Technology & Products, Inc., we strive to perform well on a consistent basis. In addition to our skilled and experienced employees, PT&P offers a number of services that allow quick design and products of high quality engineered products.

Over the years, PT&P has maintained an alliance partnership with Bechtel and since then has set a high benchmark for other suppliers in the industry.

PT&P is proud to be one of few to receive the "Highest, Consistent Performance Balance of Plant Piping Materials" award from Bechtel. Thank you Bechtel for your patronage, and we look forward to maintaining and even exceeding a near perfect score for the years to come.

Sincerely,

**Joyce Stallings**
